DETAILED ACTION

Rescission of Office Action Dated 03/18/2008

1. The Office Action Mailed 03/18/2008 is being rescinded and replaced by the current non-office action.
2. The rejection of claims 1-37 under 35 U.S.C. 102(b) as being anticipated by Okawa, U.S. Patent No. 6,063,887 (hereinafter "Okawa") is withdrawn.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Claim 1 is directed to a process for the preparation of monomers or polymers. This is confusing consideration the

definitions of monomers (subunits of polymers) and polymers (made of monomer subunits). It is suggested that the Applicants direct the claims to a process of preparation of preparing solely monomers or solely polymers. The Examiner aware that the general formula (I) can be interpreted as polymer because of the siloxane monomer units and a monomer because of the olefinic end group. However, to one of ordinary skill in the art the general formula (I) can also mean a reactive polymer. Thus, to erase any multiple or unwanted interpretation the Applicant should transform present claim 1 into two independent claims direct to monomer and polymer.

6. In claim 10, what's the meaning of (D3), (D4), etc.?
7. In claims 13 and 16, the process claims contain trademarks (e.g. AMBERLYST). Trademarks are not permitted in claims and should be place in the specification.

Double Patenting

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not

Art Unit: 1796

identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

9. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

10. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

11. Claims 1-37 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-15 of copending Application No.

11/726,130. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims have substantially identical subject matter.

12. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

13. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

14. Claims 1-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsutsuni et al., U.S. Patent No. 6,031,019 (hereinafter "Tsutsuni"). Tsutsuni teaches a silicone macromer of claimed in the present invention. See Tsutsuni, col. 5.
